

GE HealthCare

Ultrasound for Shared Services & General Practice imaging

R2

# Versana Essential<sup>TM</sup>

Care with confidence

# Simple, effective imaging for a broad range of patients

The Versana Essential ultrasound system helps you provide world-class care with no compromise on quality. This simple, effective system has broad applicability and is a great fit for private clinics, General Practitioner (GP) offices and shared service environments as it is affordable and enables comprehensive scanning capability with image quality that ranks with the best in its class.

The system is built to perform reliably, day after day, and comes backed with robust GE HealthCare service and support coverage for your peace of mind.

## Simple. Effective. Accessible.

*World-class ultrasound designed for peace of mind.*

Excellent image quality

Time-saving clinical software for liver and thyroid assessment\*

Fast boot up,\* a highly responsive CPU\* and a large 21.5" LCD display\*

A wide variety of new probes\*

Expert service and support

Flexible financing options

\*Available on Versana Essential R2.

# A partner you can trust

## Reach new levels of excellence in diagnostics and reporting

Versana Essential is designed with reliably excellent GE HealthCare imaging technology that allows you to obtain clear images to supplement physical examinations and better tailor your care plan. It is well suited for abdominal, OB/GYN, musculoskeletal, cardiovascular, and small parts exams and has functionalities found on our most advanced systems.

- Enhanced 3D/4D performance with **V-Live**<sup>\*</sup>
- Define structure borders clearly with **CrossXBeam**<sup>™</sup>
- Evaluate blood flow for possible vessel-wall irregularities and more with **B-Flow**, **B-Flow Color**, and **Power Doppler Imaging**

## Expert, dependable service and support

- **Optional battery**<sup>\*</sup> ensures power keeps flowing should you need to move from room to room
- Easy **e-Delivery**<sup>\*</sup> of software updates
- **Probe Check**<sup>\*</sup> evaluates probe element performance, facilitating system maintenance
- Enjoy peace of mind with **multi-year service coverage** from GE HealthCare experts<sup>1</sup>

\*Available on Versana Essential R2.

# A complete solution

## Confident clinical decision making for quick referrals

Key features on Versana Essential allow you to enjoy a streamlined workflow and greater productivity. You can also count on clinical support and service excellence to help you get the most out of your system.

Optimize images while scanning with *Whizz*

*SonoBiometry* enables automated fetal measurements

Enhance or suppress the color flow signal with *Whizz Color Flow*<sup>\*</sup>

*Automated tools* enable fast, high-volume scanning

Utilize anatomy specific *productivity packages* that leverage LI-RADS<sup>®</sup> and TI-RADS<sup>®</sup>

Measure intima-media thickness with *Auto IMT*

Obtain desired scan plane with reference tool *Scan Coach*

Simplify system set-up, and product training with *My Trainer* onboarding tool

*Report templates* to standardize workflow<sup>†</sup>

*Web-based products* and *clinical tutorials* help you advance your skills<sup>‡</sup>

Create custom exam protocols and standardized workflows with *Scan Assistant*

Easily compare current and prior exams and track treatment progress with *Follow-Up Tool*

\*Available on Versana Essential R2.

<sup>†</sup>1. Local educational offerings may vary from region to region.

## Check out these convenient features

### Flexible monitor

Large 21.5" LCD display\*

Connectivity:  
VGA, HDMI, USB,  
ethernet, wireless  
and Bluetooth®

Ergonomics:  
Small footprint.  
Lightweight. Front  
and rear handles for  
easy maneuvering

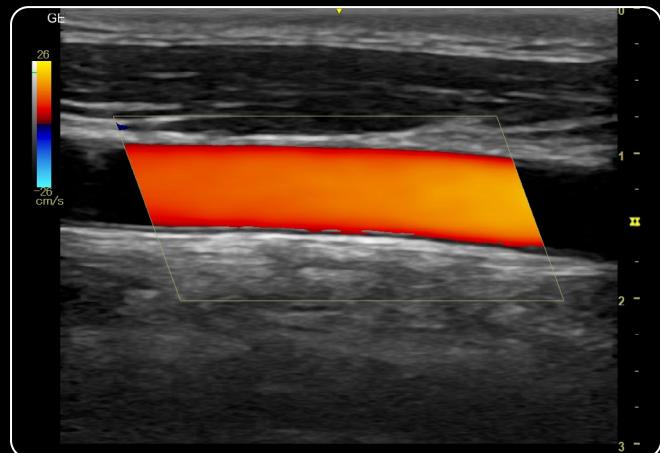

Front-facing  
probe connectors for  
easy access

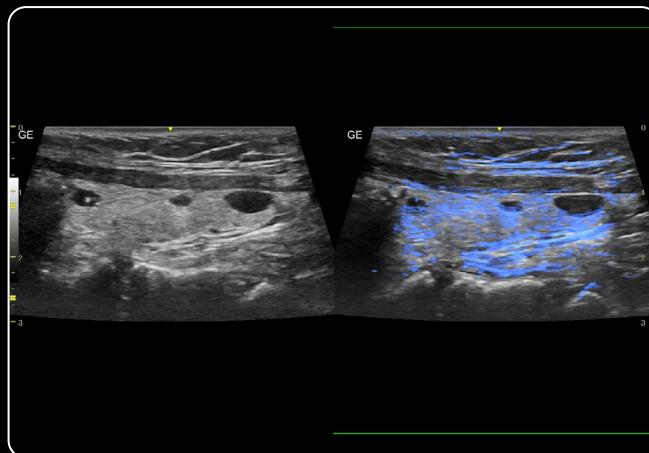

Optional battery\*:  
Helps ensure power  
keeps flowing

\*Available on Versana Essential R2.

# Ultrasound that suits you today and grows with you

The Versana Essential platform is designed to suit your practice today and in the future. Build your diagnostic confidence with a range of transducers and applications that can enhance the amount of information you see during patient exams.

The expanded probe family includes:

- **E8CS-RS\*** – a curved array micro convex endocavitory ultrasound transducer that can be applied to women's health applications, including OB/GYN, urological, and endocavitory images
- **6S-RS\*** – a phased array ultrasound transducer designed for pediatric cardiac, adult cardiac, and abdominal ultrasound applications
- **8C-RS** – micro convex ultrasound transducer that is useful across a broad range of applications including pediatric and neonatal
- **RAB2-6-RS** – curved array 3D/4D probe for resolution with OB imaging

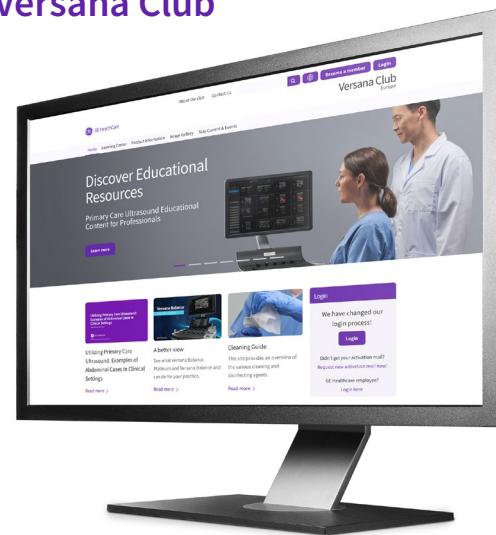

## Advance your ultrasound skills with Versana Club

Versana Club offers resources to help you build your skills, network with others and share your ultrasound knowledge.

Membership perks include:

- Image-sharing with peers around the world
- Web-based video tutorials and other educational offerings
- Information on Versana service solutions and products
- Articles on ultrasound and patient care
